Cambridge, July 22, 2009

Dear Mr Wiśniowski,

The Canadian Polish Congress as the umbrella organization unites many Polish member-organizations in Canada. Both Polish and Canadian governments recognize it as the official representative of Polish Diaspora in Canada. In our District, we have the great privilege to work with a member of Kresy-Siberia Virtual Museum International Organizing Committee, Mrs. Krystyna Freiburger.

It is not possible to put into words people's sufferings. It seems impossible to build monuments so big or great that could tell untold stories. In time when computers and internet have made the world smaller, the idea of "building" a virtual museum dedicated to part of the history of World War II and Poland, mostly unknown in the West, could not be overestimated. We believe that it is one of the best ways to ensure that victims of Soviet totalitarianism will be remembered and their voices will be heard. It is a history project of great importance not only for victims but also for all Polish emigrants living all over the world and their descendants. It is time to tell the World the whole story, our story, a story of life and death, suffering and surviving.

On behalf of all Poles living in our District and myself, I would like to congratulate the whole team working on the Kresy-Siberia project for the work done. I endorse it and I wish you strength and perseverance for the future.

Sincerely,

Urszula Walkowska

President
